ABILITY RISKWATCH®

ELECTRONIC INCIDENT REPORTING

Strengthen your incident management with **ABILITY RISKWATCH**. This application draws attention to each occurrence so you can assure a thorough investigation and a proper response and review. You can document incidents such as accidents, pressure ulcers, medication errors, falls, and any others you specify. Use the comprehensive information from each occurrence to reduce risk, decrease liability and improve resident care throughout the organization.

ABILITY RISKWATCH cues the staff to track, record, investigate, respond and analyze the occurrence while documenting all the steps from beginning to end. The thoughtful investigative process can help show the diligence of the care provided when an adverse event occurs. The system monitors individual resident occurrences, providing the care team with better notification of potential issues or adverse outcomes.

With **ABILITY RISKWATCH**, you can better mitigate risk, ensure compliance, demonstrate quality and handle audits or litigation with accurate, comprehensive documentation. It adds up to stronger performance for your organization – and fewer costs and headaches.

ADVANTAGES FOR YOUR ORGANIZATION

Reduce liability and identify potential risk
