VisionShare® Inc. Doubles Customer Base in 12 Months

4,000 healthcare providers rely on Internet-based Secure Exchange Software

MINNEAPOLIS, MN December 19, 2008 – Minneapolis-based eHealth connectivity leader, VisionShare® Inc., has doubled its reach to 4000 healthcare facilities. Just one year ago, the company announced its 2000th customer – marking record growth and industry leadership within its healthcare and Medicare electronic data communications niche. VisionShare continues to grow as more healthcare providers look to cut costs and gain efficiency through its Internet-based secure platform.

“This has been an exciting year of growth for VisionShare. With our experience in Medicare transactions and connectivity requirements - coupled with changes resulting from Medicare Contracting Reform and other industry mandates – we were able to help providers trim costs through a simple, secure solution while minimizing the disruption these events can cause,” said VisionShare President and CEO, John Feikema.

VisionShare has worked with thousands of healthcare providers impacted by Medicare Contracting Reform. As a result, the company has compiled its knowledge and launched an educational Web Site, www.contractingreform.com, which offers a video that contains information on Medicare Contracting Reform beneficial to all types of providers as well as best practice tips for preparation and how to minimize disruption in the Medicare claims reimbursement process. The Web site also includes jurisdiction-specific information and key dates for those in states currently impacted by the Reform.

In addition to delivering solutions to healthcare providers, VisionShare has also recently introduced Total OnBoarding™, an automated online self-service system for Medicare contractors and other health plan payers. Total OnBoarding™ simplifies new provider enrollment and testing, reducing manual processes and paper forms and helps to quickly move new providers into production so they can begin submitting claims and processing other electronic transactions faster. Feikema adds, “This system is particularly helpful to contractors and payers who need to quickly establish relationships with thousands of providers as a result of mandated changes like Medicare Contracting Reform and the emerging 5010 and ICD10 standards.”

About VisionShare

VisionShare® Inc., Minneapolis, Minnesota, is a leading provider of high-speed, low-cost data communication services for healthcare organizations. VisionShare has cost-

effective solutions for healthcare facilities of all sizes that enable safe, high-speed connections to multiple payers over the Internet.

The company's Secure Exchange Software is setting new standards for secure healthcare information exchange, using military-grade encryption that is CMS approved, HIPAA compliant and CAQH CORE certified. Today thousands of healthcare facilities nationwide rely on VisionShare for easy, reliable and secure access to Medicare. Visit www.visionshareinc.com for more information.
