

## **SourceMedical Teams with VisionShare; TherapySource and VisionShare Help Therapy Clinics with Medicare Caps**

*SourceMedical, a leading provider of outpatient information management solutions, today announced that it has entered into an agreement with VisionShare<sup>®</sup>, a leader in secure ehealth connectivity services. TherapySource, Source Medical's leading clinical documentation and administration system will work with VisionShare Secure Exchange Software so outpatient rehabilitation providers can access Medicare Part B cap information online from the Professional Provider Telecommunication Network (PPTN). PPTN is a view into the CMS Common Working File database to view beneficiary eligibility, claim status and more.*

Birmingham, Ala ([PRWEB](#)) May 1, 2009 -- SourceMedical, a leading provider of outpatient information management solutions, today announced that it has entered into an agreement with VisionShare<sup>®</sup>, a leader in secure ehealth connectivity services. TherapySource, Source Medical's leading clinical documentation and administration system will work with VisionShare Secure Exchange Software so outpatient rehabilitation providers can access Medicare Part B cap information online from the Professional Provider Telecommunication Network (PPTN). PPTN is a view into the CMS Common Working File database to view beneficiary eligibility, claim status and more.

TherapySource was developed specifically for physical, occupational and speech therapy clinics. SourceMedical's [therapy software](#) enables facilities to capture and manage more comprehensive, accurate clinical documentation at the point of care. Built to handle multiple sites across the enterprise, TherapySource streamlines and automates clinical and financial processes, including therapy scheduling, registration, and clinical documentation. The automated coding and compliance features of TherapySource allows clinicians to spend less time on administrative processes and more time on providing quality patient care.

With this new partnership, SourceMedical customers will be encouraged to utilize VisionShare Secure Exchange Software to access the PPTN system. PPTN provides real-time access which allows providers to check claim status, pending claims, accounts receivable details and other billing information.

"We are very excited about the new partnership between VisionShare and Source Medical. VisionShare Secure Exchange Software will allow Source Medical customers to connect with Medicare using a secure high-speed Internet connection," said John Feikema, VisionShare President and CEO. "Using VisionShare, physical therapy providers can now check Medicare cap eligibility information quickly and efficiently. In many cases, we've found that this helps providers improve accounts receivable and decrease denied claims, which is especially important in today's healthcare market."

"Using PPTN to check cap eligibility information is key to providing our clients the remaining amount available in Medicare Therapy Caps. This is an informative tool that will positively affect their bottom line profitability and reduce claim denials." said Ralph Riccardi, President and Chief Operating Officer of SourceMedical's Therapy Division.

About VisionShare

VisionShare® Inc., Minneapolis, Minnesota, is a leading provider of high-speed, low-cost data communication services for healthcare organizations. VisionShare has cost-effective solutions for healthcare facilities of all sizes that enable safe, reliable, high-speed connections to multiple payers over the Internet.
