VisionShare Expands Availability of Web-based Solution for Part B Claims Transactions and Eligibility

Unique offering will roll out to providers in
New Mexico, Oklahoma, Colorado, Iowa, Kansas, Nebraska, Missouri and Texas

MINNEAPOLIS – March 4, 2008 – VisionShare Inc. a leading provider of secure, low-cost, reliable data communications services for the healthcare industry, today announced the launch of the *VisionShare* Secure Exchange Site™ to providers in New Mexico, Oklahoma, Colorado, Iowa, Kansas, Nebraska, Missouri and Texas. Secure Exchange Site is a secure Internet portal that allows healthcare providers to administer Part B Medicare claims directly from their Web browsers. The portal will serve as a high-speed connection to the new Medicare Administrative Contractors for Jurisdictions 4 and 5: TrailBlazer Health Enterprises, LLC for Jurisdiction 4 and Wisconsin Physicians Service Insurance Corporation (WPS) for Jurisdiction 5. All services for each state are bundled into a single package for one low, flat-rate monthly subscription fee.

“We’re very excited to offer Part B providers a solution that gives them access to essential Medicare information from a single Web site. It makes our progressive connectivity solution accessible to small- to medium-sized Part B providers in an easy to use, cost-effective medium,” said John Feikema, president and CEO of VisionShare. Providers in Jurisdictions 4 and 5 will be able to send claims, receive remittance advice in an easy-to-read electronic format, check the status of Medicare claims all the way down to claim line level detail, and confirm Medicare eligibility. Where the contractor makes it available, providers will also have access to PPTN (Professional Provider Telecommunications Network), an application that gives Part B Medicare providers direct access to a patient’s common working file to look-up information in real-time, such as accounts receivable, beneficiary eligibility, claim status, diagnosis codes, procedure codes, check status, payment information and more.

VisionShare developed Secure Exchange Site as a cost-effective solution for Part B providers throughout the United States who want to benefit from the convenience and speed of electronic claims administration without purchasing and maintaining hardware, and was initially introduced in New York, Ohio, South Carolina and West Virginia. “The Site allows us to expand our secure communications infrastructure to the Part B market and complements our server and desktop solutions well,” notes Feikema. Currently over 5000 healthcare providers use *VisionShare* server and desktop solutions for secure Medicare claims processing.

Providers that choose Secure Exchange Site will note a number of productivity and time-management enhancements:

Reliable, fast connectivity

Connectivity is through the provider's existing Internet connection. A high-speed Internet connection reduces, or even eliminates, the long screen refresh times and dropped connections inherent in dial-up communications.

Logical, streamlined work flow

Superfluous logins and "clicks" are eliminated, and the entire work flow has been streamlined to save time when accessing services.

Fast learning curve

Navigating and using the site was designed to be intuitive and uncomplicated. For example, providers will be able to access all available payers from a single screen on the Site's home page. That means users won't need to learn different software and processes for different payers.

VisionShare plans to continue rolling out Secure Exchange Site throughout the United States, focusing on states undergoing transitions through important, mandatory modernizations to the Medicare fee-for-service program's administrative structure. Actual services will vary from state to state, depending upon the payers assigned to the state and transition award particulars.

Upon their transition dates, Secure Exchange Site standard services will be available for Part B Professional providers at a \$29.95 monthly subscription fee. An interactive demo, additional product details and subscription information is available for New Mexico, Oklahoma, Colorado and Texas at www.visionshareinc.com/trailblazer and for Iowa, Kansas, Missouri and Nebraska at www.visionshareinc.com/wps.
