

HIPAA Eligibility Transaction System (HETS)

Fast, anytime access to Medicare Eligibility

Using your existing high-speed Internet connection instead of dial-up to connect to Medicare systems can simplify access for your billing staff and IT departments, and help them work more efficiently.

Medicare eligibility information through HETS is available for all Medicare lines of business (Part A, Part B, DMERC, RHHI and Railroad) as well as all states through this one service.

Decrease Medicare denials and improve efficiency

Billing staff can now quickly check Medicare eligibility anytime using *VisionShare*® access to the Medicare HETS eligibility database. The HIPAA Eligibility Transaction System, or HETS, was created specifically for beneficiary eligibility verification, and provides real-time eligibility data to Medicare providers, suppliers or their authorized billing agent.

Simple to use – Because HETS is less complicated to navigate than the Fiscal Intermediary Standard System (FISS), it is useful in circumstances where users need quick access to Medicare eligibility. *VisionShare* can provide you with a simple-to-use interface to access HETS or, if your billing system can already create an automated eligibility inquiry, we can route that transaction as well.

Fast results – Providers who submit an eligibility request through HETS typically receive a response in just seconds!

Identify changes in insurance – Check eligibility as often as you wish to determine whether a patient has enrolled in a Medicare Advantage or HMO plan.

Easy-to-read response format – *VisionShare* customers can receive the HETS Eligibility Response Report in a concise, practical format. The report is organized so providers can very quickly establish a patient's eligibility. And for those providers that want a hard copy of the Report, the layout is also printer-friendly.

Convenient – HETS is available 24X7. That makes it ideal for checking eligibility during admissions at emergency rooms, remote facilities, urgent care, or anyone who needs to access beneficiary eligibility information in real time.

No surprises – Pay just one low, flat rate to check eligibility whenever you want, as often as you want.

The VisionShare HETS Eligibility Response Report

About VisionShare

VisionShare is a leading provider of high-speed, low-cost data communication services for healthcare organizations. The company's Secure Exchange Software is setting new standards for secure healthcare information exchange, using advanced encryption and authentication technologies that exceed regulatory requirements for Protected Health Information. VisionShare has cost-effective solutions for facilities of all sizes that enable safe, high-speed connections to multiple payers over the Internet.

You need just four pieces of patient information to obtain eligibility results – including secondary insurance information.

- Patient's full name
- Date of birth
- HIC Number
- Date of service

Connect with confidence – VisionShare solutions are CMS approved, CAQH CORE certified and HIPAA compliant.
