### About EZBIS

EZBIS, Inc. is the nation's foremost manufacturer of comprehensive, custom featured chiropractic software. EZBIS has been developing and marketing software that is specific to the chiropractic industry since 1980.

**MINNEAPOLIS (March 27, 2018)** – **ABILITY® Network**, a leading healthcare information technology company, and EZBIS, Inc., the nation's foremost provider of comprehensive chiropractic software, today announced a partnership to help providers simplify the complexities of managing their revenue cycle.

EZBIS, Inc will integrate ABILITY's EASE® All-Payer Revenue Cycle Management (RCM) application (EASE All-Payer) into its EZBIS Office platform, the company's complete practice management solution. EZBIS Office combines billing, collections, scheduling, electronic health record and a patient self-check-in module in one platform. Adding EASE All-Payer to this platform will give chiropractic providers using EZBIS Office seamless access to ABILITY's comprehensive cloud-based, SaaS application to manage their revenue cycle.

EASE All-Payer helps providers by automating time-consuming, manual tasks, such as eligibility verification, and saves staff time and prevents delivering unreimbursed services. EASE All-Payer also helps ensure adherence to payer rules and edits. By making sure that claims submitted to payers are clean the first time, providers save money and staff time by reducing manual follow-up after the claim has been sent.

"Working with chiropractic clinics for nearly 40 years means that we understand the unique challenges chiropractic providers face related to managing their revenue cycle," said Tonio Cutrera, marketing director, EZBIS. "To improve revenue cycle performance, chiropractic practices need an application that can streamline critical RCM processes. We are thrilled to partner with ABILITY, to help our chiropractic clients improve their business performance."

"Managing claims and reimbursement can be complex, cumbersome and time consuming," said Bud Meadows, executive vice president and chief revenue officer of ABILITY. "In partnering with EZBIS we create an incredibly powerful combination of specialized software to help chiropractic providers simplify revenue cycle complexity."
