

ABILITY Network Inc. Transaction Definitions Addendum

The information set forth below describes the methodology used by ABILITY to identify and count transactions for ABILITY Services which have fees that are based on transaction counts. When referenced in or attached to a Quote, this Addendum is incorporated into the agreement between ABILITY Network Inc. and Customer.

Service Name	Description of transactions used to determine charges
ABILITY CHOICE Medicare Eligibility	A transaction is defined as a Medicare Eligibility response in ANSI X12 271 format that is received by the Customer.
ABILITY CHOICE Medicare Claims	A transaction is defined as a Medicare Claim in ANSI X12 837 format that is submitted by the Customer.
ABILITY CHOICE All Payer Claims	A transaction is defined as a Claim in ANSI X12 837 format that is submitted by the Customer.
ABILITY CHOICE All Payer Eligibility	A transaction is defined as an All Payer Eligibility response in ANSI X12 271 format that is received by the Customer.
ABILITY COMPLETE	A transaction is defined as an All Payer Eligibility response in ANSI X12 271 format that is received by the Customer.
ABILITY EASE Home Health and Hospice	The census of patients active in the ABILITY EASE application.
ABILITY EASE Skilled Nursing	The number of Customer NPI's. The National Provider Identifier (NPI) is a HIPAA-required unique 10-digit identification number used to identify covered health care providers.
ABILITY ILLUMINATE Acute Care	The creation of a new Patient Referral workflow instance (Saved as Draft or Posted) by the Acute Care Customer is counted as a transaction.
ABILITY ILLUMINATE Post-Acute Care	The following transactions apply to ABILITY ILLUMINATE Post-Acute Care Customers.
Patient Referral Workflow	The creation of a new Patient Referral workflow instance (Saved as Draft or Posted) by the Post-Acute Care Customer is counted as a transaction.
Tier I - Notification	A Patient Referral displayed on the ABILITY ILLUMINATE dashboard as a Status of "New" is counted as a transaction. A New Referral in Your Area notification is displayed when a Patient Referral is posted by an ABILITY ILLUMINATE Acute care customer within the geographic area defined by the ABILITY ILLUMINATE Post-Acute Care Customer.
Tier II - Interested	Each Patient Referral workflow instance that is changed to a Status of "Interested" is counted as a transaction. Undo and Redo changes in status are not included in transaction counts.
Tier III - Confirmed	Receipt of confirmation from the Acute facility to move forward with the discharge, as indicated by a Status of "Confirmed ", is counted as a transaction.
ABILITY AuditDocs	The number of pages submitted via AuditDocs
