

**Years of comprehensive healthcare insight**  
**170+ million unique covered lives**  
**ONE RELIABLE SOURCE**

**Enabling you to help your clients confidently answer strategic questions for their business.**

ABILITY has one of the most unique primary source datasets in the industry. Whether you're interested in outcomes research, pharmaceutical and medical device efficacy, or practice pattern analysis, ABILITY is your go-to partner to improve the healthcare outcomes and economic performance for your clients and the populations they serve.

**ABILITY has clear, quantifiable benefits:**

One of the largest, national healthcare datasets with:

**90+ million** unique medical covered lives over a 12-month period

**130+ million** unique medical covered lives over 3 years

**170+ million** unique medical covered lives over 5 years

**NPI Included** to identify providers treating patients

**160+ payers** providing medical and Rx claims

Patient datasets that **can be linked** to third-party data sources (EHR, lab results) for expanded patient insight

**Geographically represented data**

**ABILITY delivers unparalleled insight to:**

Explore current and potential patient populations for your therapy protocols

Examine trends in utilization

Assess performance on disease-specific quality measures and other value-based metrics

Track the patient journey

Provide clinical condition and therapeutic specificity

Evaluate the magnitude and impact of therapy adherence on patient experience

Monitor persistency
