

ABILITY CAREWATCH

Leverage your clinical data to boost reimbursements, improve resident outcomes and simplify quality management

Staying competitive in today's value-based healthcare market hinges on an accurate and objective analysis of your quality and outcomes data to support resident care decisions. It takes much more than a scrubbing tool for Minimum Data Set (MDS) assessments.

With **ABILITY CAREWATCH**, you have the right tools to make more informed care decisions, improve resident outcomes, maximize reimbursements, enhance star ratings, monitor performance and stay compliant.

Join the thousands of skilled nursing facilities across the U.S. that rely on **ABILITY CAREWATCH** to simplify quality management, optimize revenue and reduce citations.

ADVANTAGES FOR YOUR ORGANIZATION

Get more accurate MDS assessments and higher reimbursements

- Catch MDS issues early and boost assessment accuracy
- Find untapped, justifiable revenue
- Estimate PDPM reimbursements and Interim Payment Assessment (IPA) daily rates
- Manage Medicare Value-Based Purchasing (VBP) Program revenue

Reduce survey citations

- Spot risks for survey tags and quickly capture errors for resolution
- Identify mismatches in logic
- Transmit MDS assessments directly to CMS
- Simplify quality reporting

Drive continuous improvement

- Steer QAPI initiatives
- Decrease readmissions
- Monitor your Five-Star quality rating status
- Compare performance with state and national benchmarks

APPLICATION FEATURES

PDPM Calculator Maximize your revenue potential with a built-in calculator that enables you to ensure proper reimbursement, identify the reimbursement and care level of each patient, decide whether to submit an IPA and more.

Logic flags Ensure MDS integrity and accuracy through a series of logic checks that call out inconsistencies in your assessments BEFORE submission, allowing you to make corrections or compile appropriate justification documentation

Transmission Watch Transmit assessments directly to CMS via ABILITY CAREWATCH. Receive feedback, validation and CASPER reports all in one place.

Quality measures Track, trend and monitor metrics through a series of reports and charts designed to identify where your facility stands in relation to state norms and other ABILITY CAREWATCH facilities

Monitor acute care readmissions Track hospital readmissions, review admissions and discharge assessments, evaluate lengths of stay, identify residents at risk and monitor diagnosis trends.

Survey Watch Prepare for surveys using the Care Compare survey data from Nursing Home Compare (NHC), which CMS updates every month.

Clinical Watch pages Monitor and track resident status as “Improved” or “Deteriorated” so you can identify needed interventions.

Customized state-specific Medicaid watch pages Actively manage Medicaid payments, increase services to your residents and ensure appropriate reimbursement for your facility.

Most current assessment data As MDS assessments are entered into ABILITY CAREWATCH, the data is pulled into your 802 and 672 reports for the selected date range with access to the history of any changes made.

Enterprise reporting Review the most common flags triggered, benchmark against other ABILITY CAREWATCH facilities, compare quality measures and review the timeliness of MDS assessments and transmissions.

About ABILITY® Network

ABILITY® Network, an Inovalon Company, is a leading cloud-based, SaaS information technology company helping providers and payers simplify the administrative and clinical complexities of healthcare through innovative applications and data analytics. The combination of myABILITY and the Inovalon ONE™ Platform creates a vertically integrated cloud-based platform empowering the achievement of real-time value-based care from payers, manufacturers, and diagnostics all the way to the patient's point of care.
