ABILITY SMARTFORCE™ Attendance
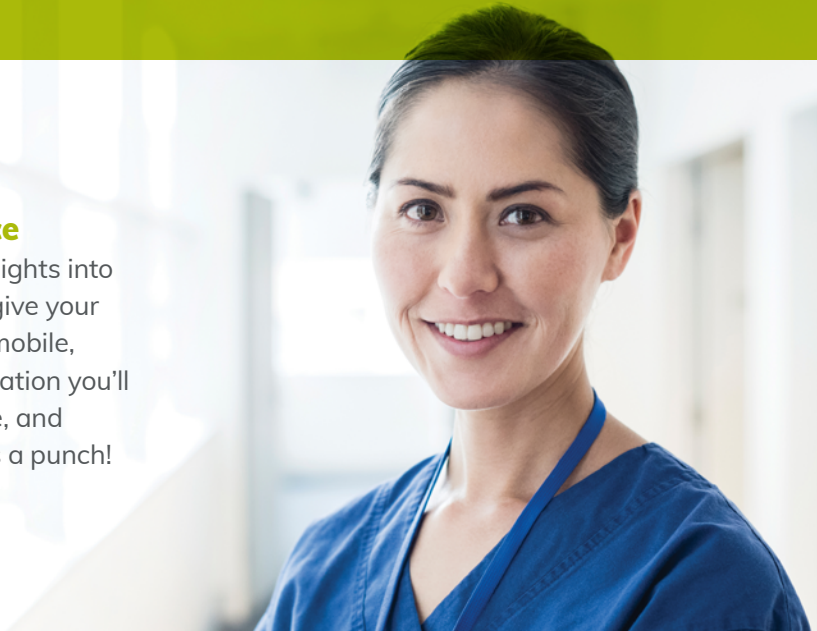

TRACK TIME & ATTENDANCE IN THE CLOUD

ABILITY SMARTFORCE Attendance
moves your punch clock to the cloud. Get insights into staff punches, compliance and trends, and give your staff the freedom to punch in and out from mobile, tablet or desktop applications. With geo-location you'll know staff members are punching in on-site, and iBeacon will prompt staff so they never miss a punch!

ADVANTAGES FOR YOUR ORGANIZATION

Mobile convenience – Go fully mobile and enable staff to punch in and out from their phones or tablets. Eliminate queuing at the time clock.

Flexibility – The application can also be used on a desktop computer, and while it eliminates the need for traditional punch clocks, it can be used in conjunction with them if desired.

Real-time views – Managers get mobile access to data on staff punches, and alerts for missed punches, missed breaks and late punch-outs.

Streamlined closing of time cards – Automatically compare time punches with the schedule. Perfect matches can be closed with one click, non-matches are flagged with warnings (early or late) or errors (missing punches).

Communication – Alerts for both managers and staff keep everyone informed. Data is easily accessible to all parties involved.

Compliance tracking – Define and track attendance policies, time-keeping rules, contractual commitments and regulatory requirements.

Insightful reports – Managers can review activities and reports to address tardiness, overtime use and sick calls by individuals, units, departments or across facilities. A history log captures who modified what and when.

APPLICATION FEATURES

Geo-location with iBeacon technology – More accurate than GPS, iBeacon recognizes a fixed location within a few feet so you know where employees are when they clock in from their mobile phones or tablets.

Auto-Code – Streamline pay code management by defining pay codes like holidays or orientation up front. The system then automatically adds these codes based on the schedule.

Integration with ABILITY SMARTFORCE Scheduler – See flags on the live schedule when staff have clocked in or missed their shift. Run a variance report to show how actual worked hours differ from scheduled hours.

"

It streamlines staffing, improves communication, contributes to greater efficiency and produces more time for patient care.
