

Benefits for Your Organization

- **Use a single staging platform** – Streamline preparation and validation of your PBJ files from multiple systems prior to transmission to CMS
- **Accurately check data** – Potential errors or inconsistencies in your PBJ files are flagged to ensure accurate submissions; you'll also receive Final File Validation Reports through PBJ Transmission Watch
- **Quickly correct errors** – Efficiently manage corrections and make the necessary payroll changes long before the quarterly deadline
- **Transmit with confidence** – Your PBJ data will be accurate, accessible, and on time
- **Analyze staffing trends** – User-friendly reports allow you to identify trends and patterns to help you improve your operation

It's not easy to interpret all of the new Payroll Based Journal (PBJ) rules and definitions and what they really mean for your organization. CMS provides tools to manually create PBJ reports, but the creation can be labor-intensive and you'll still need to check for errors before submitting. That's why ABILITY created **ABILITY | CAREWATCH PBJ**, to help you comply with the mandate – AND bring a new dimension to your overall quality management.

ABILITY | CAREWATCH PBJ helps ensure that you are sending accurate, thorough data to CMS. With the reporting capabilities, you will also be able to track trends and use the results for performance improvement.

Product Features

- **Robust, embedded business rules** ensure CMS PBJ data submission specifications are met
- **Built-in scrubber** detects and alerts users to any format and inconsistency errors and warnings
- **Online help** within **ABILITY | CAREWATCH PBJ** gives you clear, illustrated instructions for every step of the PBJ submission and reporting process, including requesting historical reports

ABILITY | CAREWATCH®
PBJ

- **Easy implementation, with minimal IT involvement** — ABILITY web-based services are compatible with current versions of industry-leading browsers (e.g. Internet Explorer, Chrome, Firefox)
- **BONUS for current ABILITY | CAREWATCH customers** – You can compare expected staffing requirements with actual staffing requirements using PBJ integration with the Nursing Minutes Report

Use **ABILITY | CAREWATCH** for both your PBJ and MDS data

The **ABILITY | CAREWATCH** application helps you prepare for surveys, obtain correct reimbursement, lower costs, and enhance resident quality of life by assisting staff with every aspect of the RAI process. You'll be able to improve MDS data consistency, conduct more thorough assessments, monitor quality, and support continuous improvement plans. Add the PBJ feature to cover your PBJ submission and evaluation needs. Contact ABILITY to get started today!
