

It's so much more than a scrubbing tool for Minimum Data Set (MDS) assessments! With **ABILITY CAREWATCH**, you'll have the right tools to simplify quality management and strengthen your business across the enterprise.

**Do these sound familiar?**

- Are we missing reimbursement opportunities?
- What would another set of eyes be worth?
- Does our documentation support the care provided?

Thousands of skilled nursing facilities (SNFs) across the United States rely on **ABILITY CAREWATCH** to help them improve resident assessment data accuracy and enhance care plans via analysis of the MDS. **ABILITY CAREWATCH** helps you prepare for surveys, obtain correct reimbursement, lower costs and enhance resident quality of life.

**ADVANTAGES FOR YOUR ORGANIZATION**

**Get more accurate MDS assessments and higher reimbursements**

- Catch MDS issues early and boost assessment accuracy
- Find untapped, justifiable revenue
- Summarize by location, by state and more

**Reduce survey citations**

- Spot risks for survey tags
- Identify mismatches in logic
- Easily identify errors for resolution
- Transmit MDS assessments to CMS
- Manage 802 and 672 reports

**Drive continuous improvement**

- Drive QAPI initiatives
- Monitor your 5-Star quality rating status
- Compare results with targets
- Compare with state and national levels
- Prioritize training needs
- Decrease readmissions

## APPLICATION FEATURES

**Logic flags** – Ensure MDS integrity and accuracy through a series of logic checks that call out inconsistencies in your assessments BEFORE you submit them to CMS, allowing you to make corrections or compile appropriate justification documentation.

**Transmission Watch** – Transmit assessments directly to CMS via ABILITY CAREWATCH; receive feedback, validation and CASPER reports all in one place.

**Quality measures** – Track, trend and monitor QMs through a series of reports and charts designed to identify where your facility stands in relation to state norms and other ABILITY CAREWATCH facilities.

**Monitor acute care readmissions** – Track your rate of re-entries; review admissions and discharge assessments; review lengths of stay between admissions and discharges; identify residents at risk, and monitor diagnosis trends.

**Clinical Watch pages** – Monitor and track resident status as “Improved” or “Deteriorated” so you can identify needed interventions.

**Customized state-specific Medicaid watch pages** – Actively manage Medicaid payment, increase services to your residents, and ensure appropriate reimbursement for your facility.

**Most current assessment data** – As MDS assessments are entered into ABILITY CAREWATCH, the data is pulled into the reports for the date range you select, giving you online access to your 802 and 672 reports and a history of any changes made.

**Enterprise reporting** – Review the most common flags triggered, benchmark against other ABILITY CAREWATCH facilities, compare QMs, and review the timeliness of MDS assessments and transmissions.

**Revenue potential** – View your HIPPS codes before transmitting your assessment and plan ahead for the next MDS; optimize resident care and proper reimbursement for your services and care.

**Easy implementation, with minimal IT involvement** – ABILITY web-based services are compatible with current versions of industry-leading browsers.

### The myABILITY Platform

Connect to all of your ABILITY services via myABILITY, a SaaS delivery platform that gives you on-demand access to everything you need. Whether you need quality analytics, eligibility and claims, revenue cycle management or workforce management services, ABILITY can help your clinical, financial, operational and administrative areas work more effectively and efficiently.
