

Discover How ABILITY Simplifies Healthcare Complexity

Save time and increase efficiency at every point along the continuum of care.

All About ABILITY

ABILITY Network, an Inovalon company, is a leading information technology company that helps healthcare providers and payers simplify administrative and clinical complexity.

You may already know and trust ABILITY for providing fast and easy direct access to Medicare, but did you know we offer so much more?

ABILITY is your one-stop shop, providing applications that support you every step of the way: from patient check-in and eligibility verification to quality management, claims processing and staff scheduling.

Whether you want to streamline your revenue cycle, improve care quality or better manage your workforce, ABILITY has cutting-edge applications that save time, reduce hassles and simplify daily tasks.

Specialized

Every application we deliver is data-driven and built on a foundation of extensive administrative and clinical expertise coupled with technological proficiency.

Easy-to-use

Our applications are easy to implement and use, allowing providers to focus on driving performance and maximizing ROI.

Interconnected

Our applications optimize results with interconnections between reimbursement, quality and staffing.

Provider-specific

Every application is designed to meet the unique needs of each provider type, organization size and role.

Accessible

Access our applications via a single platform that is unique, cloud-based, integrated and EHR-neutral.

The powerful **ABILITY platform** gives payers and providers the connectivity they need to meet a variety of specific challenges. Providers save time and achieve more during their day-to-day operations in three key categories:

Revenue cycle management (RCM) A full suite of RCM applications accelerates your revenue cycle through automation, increasing efficiency and accuracy of your daily tasks. Our products help you streamline claims, eligibility, patient payments and more.

Care quality management Our care quality applications support post-acute quality reporting, management and reimbursement optimization. Our analytics applications perform benchmarking, generate care quality reports and prioritize risk management.

Workforce management Workforce management analytics help you manage staffing and credentialing needs. Our applications help you schedule staff and physicians, track credentials and monitor time and attendance.
