PC-ACE ROSTER BILLING UPDATE(COVID-19)

1. Logic has been added in PC-ACE 4.9 Roster Billing module for all COVID-19 vaccine codes to NOT populate ANY administration codes while generating the claim from Roster Billing Form. When a COVID-19 vaccination code is selected in the Roster Billing functionality, a single-line claim will be created containing only the vaccine code. Users will need to add the appropriate Administration Code, if necessary, and will be responsible to select the correct code. This allows users the flexibility to bill COVID-19 related items to meet their business and payer needs.

Note: If a charge is entered in both the 'Vaccine Chg.' and 'Admin Chg.' Fields, a claim will be created containing the Vaccine code and associated charge. The users should verify/Recalculate correct claim total and codes within PC-ACE claims list.

2. Logic has been added to ensure when an 'Admin' COVID-19 related code is selected within the Roster Billing functionality an additional 'Default' admin code is NOT added to the claim. (Example: If user selects 'M0201' in Roster Billing functionality, a default 'G0008' will not appear on the claim file.)
3. All 'Vaccine' and 'Admin' codes are present in the main HCPCS table for usual Institutional/Professional claims processing. The presence of each code type will allow user to add them to claim lines to ensure their billing needs are met.
4. Please see Appendix -1 for List of COVID-19 related codes added for Roster Billing.

Installing the upgrade

Perform a full PC-ACE database backup before installing the upgrade. To install the upgrade, run the attached PCACEUP.EXE file using Windows Explorer or equivalent and follow the simple upgrade wizard steps. When prompted, enter the upgrade password provided by your software supplier. For networked instructions, it is recommended (but not required) that the update be run from the server's console.

IMPORTANT: The recommended database backup is for safety purposes only and should NOT be restored after successfully installing the update. The update program preserves all existing claims and reference file settings

Appendix - 1

Following Codes are added in PC-ACE 4.9 Roster Billing. Please note that Specific code descriptors will be updated in the future as per CMS update.
